

Matrix 360/6

OVERVIEW

The YES-EU Matrix 360/6 is a highly flexible DC charging system expertly engineered to serve multiple parking bays efficiently. Acting as a smart power hub, it distributes massive energy capacity, ensuring your growing fleet is charged rapidly without overburdening your facility's local grid connection.

SPECIFICATIONS

Power

360 kW per base unit, linkable to 1,080 kW

Max output current

500 A

Output voltage range

150-1000 Vdc (800 V-ready)

Supply voltage

400 Vac

Max input current

533 A

Charging standard

IEC 61851-1 / -23

Charging points

2 to 6 terminals

Per-terminal

300 kW CCS High Speed

Connectors

CCS2 · CCS High Speed · GB/T

Interface

7-12" touchscreen · RFID

Communication

4G · Ethernet

Smart control

OCPP 1.6J dynamic distribution

Operating temp

-20 degC to +50 degC

Protection

IP54

Dimensions (WxDxH)

1000 x 800 x 2100 mm

Weight

650 kg
