

Emergency Charger

OVERVIEW

The Emergency Charger brings high-power charging to places where no fixed installation is possible. It keeps vehicles and heavy-duty machines working in the field and cuts downtime when it matters most.

SPECIFICATIONS

Charging power

40-150 kW (adjustable)

Battery capacity

45-322 kWh

Max charging current

<= 250 A

Gun output power

150 kW

Gun output current

0-200 A (CCS2) · 0-250 A (GB/T)

Gun output voltage

300-1000 Vdc

Connectors

1 or 2 x CCS2 · 7 m cable

Standards

CCS2 · CHAdEMO · GB/T

Interface

10" touchscreen, touch-start

Operating temp

-10 degC to +60 degC

Protection

IP54 · liquid cooling

Recharging

DC <= 250 A · AC 63 A

Size / weight

2300x1500x1200 mm · ~1,980 kg (175 kWh)

Smart control

OCPP 1.6 remote management
